

Mission

FURNITURE

Mission style furniture has always been an exercise of form following function. It has a striking appearance and sturdy construction that was created by the legendary craftsman William Morris in the mid 1850's. This Mission furniture was styled to suit the homes of the 21st century. It incorporates classic Mission features like the exposed tenon and mortise joinery in the post, vertical slat motif in chairs and beds and the arched base rail in the cases.

Pick your style from three furniture designs that complement any of the Cottages at Crescent Park.
